FIG. 25

FIG. 26 is a schematic diagram of a purchase order receipt screen 110. The screen 110 is divided into two main sections: a purchase order detail display field 110a and a try-on image display field 110b. The purchase order detail display field 110a contains a list of purchase order information, including customer name, customer number, transaction receipt code, purchased commodity, fashion style, purchase price, quantity, and date of delivery. The try-on image display field 110b shows a try-on image of a customer, with a label 'TRY-ON IMAGE' and a label 'CUSTOMER'S OWN FACE PHOTOGRAPH' pointing to the image.
